

Migrating to MYOB Ledger for BankLink Practice

Redirection Notice

This page will redirect to <http://help.myob.com/wiki/x/8wRNAQ> in about 5 seconds.

For MYOB BankLink Practice integration with MYOB Ledger, migrate your MAS ledger to MYOB Ledger.

The migration process has three tasks:

1. Configure the ledger	2. Migrate to MYOB Ledger	3. Check post-migration logs
--------------------------------	----------------------------------	-------------------------------------

Migration includes ledger details, Charts of Accounts and closing balances of the financial year. Migration is always for the full financial year. Comparative figures are migrated into MYOB Ledger, so you can use the figures for review processing and produce financial statements with up to 5 years of figures.

Migration does not make any changes to MAS.

Configure the ledger

Before migrating, you need to configure the ledger as MAS.

To configure the ledger

Migrate to MYOB Ledger

To migrate an existing ledger to MYOB ledger

Check post-migration logs

After migrating to MYOB Ledger, review the migration log and check the tax codes.

To review the migration log

To check the tax codes
