

# Set up superannuation funds

*AccountRight Plus and Premier, Australia only*

The super funds your employees belong to need to be set up in AccountRight. So in addition to [setting up superannuation payroll categories](#), you'll need to:

1. Add the standard and self-managed (SMSF) super funds that your employees use
2. Assign the relevant funds to your employees.

## Before you can set up superannuation funds

You need to register for Pay Super - it's included with your AccountRight subscription and you can use it to make super payments directly from AccountRight. This ensures you stay on top of government obligations, including SuperStream.

If you had already set up any self-managed super funds before registering for Pay Super, you'll need to create new self-managed super funds for these employees after registering for Pay Super.

To add a standard super fund

To add a self-managed super fund

To assign funds to your employees

To edit or delete a super fund

## To set a default super fund

Go to the **Setup** menu > **General Payroll Information** > **Default Superannuation Fund**.
